

TRADITIONAL VIDEO CONFERENCING

PROBLEM 1

In a Boardroom to boardroom – remote participants are small on the screen

In a hybrid meeting, the desktop users see the boardroom as an even smaller image on their screen
No facial expression or body language is visible.

PROBLEM 2

The more people in the room the smaller they appear on the screen.

PROBLEM 3

Incoming participants often have a side-on view of the people in the boardroom.

PROBLEM 4

Whiteboards and flipcharts are often not visible and cannot take part in the meeting.

NEW INTELLIGENT VIDEO CONFERENCING

SOLUTION 1

The dynamic composition and Intelligent Video Bar anticipates and detects who is speaking and intelligently adjusts the picture to focus on the speaker bringing the human touch to your virtual meeting.

SOLUTION 2

Dynamic composition technology provides in-video close up view of all boardroom participants

SOLUTION 3

The re-invented 180° camera in the collaborative soundbar and a redesigned boardroom layout means nobody is distorted or missing from the picture.

SOLUTION 4

Real time white board content and collaboration makes interactive presentation easy.
